Document holders

Sometimes a small accessory or particular can solve an annoying problem. The availability of an intelligent set of accessories is often the key to usability and real value.

Internal accessories in carbon steel are often a weak point for cabinets designed for harsh environments.

Among the other “intelligent” accessories, Iinox provides a range of document holders to be mounted on the internal side of the cabinet doors.

The holders are available in AISI 304 stainless steel or in ABS, so as to guarantee resistance to humidity and oxidation.

They are supplied in mounting kit, both in A4 and A3 size, and are usually glued to the door.

On request, cabinets can be supplied with the holders already mounted, also screwed or welded.
