

Product lines: MX

## Complete modularity of the MX range

The MX line of cabinets has been developed with a totally modular concept:

The cabinet is built around a rugged internal frame, realized in 6 pieces: square bottom and top, and 4 columns.

The frame is mounted in minutes, with only 8 screws

A system of pins and mechanical guides ensures the perfect relative positioning of all components

Hinges are pre-mounted both on frame and on door

Side walls, top, bottom and doors are supplied to realize any combination of sizes and access.

A very wide range of accessories allow a perfectly tailored final result.

The cabinet can be delivered in mounting kit, so as to save transport costs and warehouse space, or already mounted, for immediate utilization.

The result of the modular concept is a set of high-value customer advantages:

Reduced transport cost

Much better stockability, due to modular concept and compact packaging

Very rugged structure, due to the internal high duty frame

Total freedom in definition of the architecture

Among the available accessories:

Side and back walls

Internal separation set

Internal bar system

Junction kit

...and, of course, the standard accessories
